

# Process Safety Management

## Why do I need a process safety management system?

A proper process safety management (PSM) system can help you comply with local, state and federal PSM regulations. A proactive approach, coupled with properly planned and implemented PSMs, can help minimize loss of life, environmental impact, equipment damage, citations and litigation.

## Incorporating the Best Process Safety Management Systems

The key to implementation of effective process safety and risk management systems is to develop a common framework that includes local regulatory requirements, corporate standards and recognized and generally accepted good engineering practices (RAGAGEPs).

## Experienced Professionals

ioMosaic professionals have decades of experience working with PSM systems, which means you will have unrivaled efficiency and expertise at your disposal.

Our experts are at the forefront of PSM proficiency, having worked with numerous industry groups and companies to develop safety and risk management systems, guidelines, standards and audit protocols.

Our personnel can help you comply with:

- Internal company standards
- CCPS, ACC, API and other RAGAGEPs
- OSHA's PSM Standard
- EPA's RMP Rule

Let ioMosaic help you feel confident in your process safety decisions.

## The Enterprise PSM Software Solution: ioXpress™

ioMosaic also supports ioXpress™, a software tool that streamlines PSM/RMP systems using today's technology. ioXpress offers:

- Process safety information, including basis for emergency relief system sizing
- Incident investigation
- Management of change
- Process hazard analysis
- Audits

Let ioMosaic help you implement an inclusive and reliable PSM system on which you can depend.

## About us...

ioMosaic Corporation is the leading provider of safety and risk management consulting services, training and software solutions. Our first-hand knowledge of industry standards and regulations, coupled with decades of experience, provides us the rare ability to understand an issue from both the client's and regulator's perspective. We have industry-adopted tools and methodologies that we can apply to your most basic or complex problems and challenges.
