

Software Solutions

Process safety, risk analysis, engineering data and knowledge management software

A comprehensive platform for process safety, engineering data management and compliance assurance

ioXpress™

A customizable enterprise knowledge management solution that can manage all of your engineering, plant and PSM data. Includes visual workflow for management of change, incident investigation and more. ioXpress can be fully integrated with the following programs...

SuperChems™ Expert

An advanced tool for evaluating relief and flare systems and conducting consequence and quantitative risk analyses.

HAZOPtimizer™

A simple, easy to use tool to record the results of different process hazard analyses using any PHA methodology and security vulnerability analysis. Includes, multiple layer support plus numerous templates.

ioAuditor™

Audit compliance against the OSHA PSM or CCPS Risk-Based Process Safety Elements.

ioLogic™

Create and edit fault trees for any purpose using our highly intuitive visual interface. Includes SIL/SIS templates.

ioVu™

Draw piping isometrics and automatically generate piping diagrams from SuperChems.

ioFirst™

Prioritize the order in which PHAs are conducted.
