

ioXpress™

An enterprise data and knowledge management solution

ioXpress is a customizable enterprise knowledge management solution that can manage all of your engineering, plant and PSM data. It can administer workflows, manage data and documents, enable knowledge sharing, and enhance collaboration.

Streamlining Engineering Management Systems

Management of engineering and compliance information can now be implemented through ioXpress. ioXpress is a fully customizable, flexible, web-based application that allows data and information to be available and accessible to all users across a facility or throughout a corporation. Management of change, project management and safety or environmental tasks can be automated through the use of workflow and business rules engines.

Features

- Manage information by PSM element
- Centralized PSI linked to PHAs
- Manage documents and data (AutoCad, databases, email, HTML, PDF, Microsoft® products, etc.)
- Centralized action item tracking
